## Abstract of JP1017160

**PURPOSE:** To extremely increase a displaying speed with a graphic display device by simplifying the form of display data after changing it into a symbol in accordance with the purpose of display when the display data is displayed. **CONSTITUTION:** A data storage device 10 stores the display data 11 of a graphic to be displayed on a display device 40. Then the data 11 is read into a CPU 20 from the memory 10 and it is decided whether the symbolized display is designated or not for the data 11. If not, the graphic of the display data is faithfully displayed. If so, the control is delivered to a symbolized display program 32. Thus the display data of a complicated form is symbolized into the data of a simple form. This symbolized simple display data is displayed on the device 40.
